PROJECTS

MOTOCROSS GEAR Website: Developed a website for a motorbike parts shop using HTML, PHP, Bootstrap, and JavaScript. Implemented features for customers to browse and purchase items, enhancing user experience.

Weather App: Designed and developed an Android application for weather forecasting using Java and Firebase. Enabled users to receive real-time weather updates and alerts.

EduBot App: Created an educational Android application for elementary kids using Java and Firebase. Facilitated interactive learning experiences for students to enhance their knowledge base.

Aragy Health Care Hospital Website: Built an online website for a healthcare facility using HTML, PHP, CSS, and JavaScript. Implemented user authentication, appointment booking, and administrative functionalities.

Employee Management System: Designed and implemented a website for employee management using HTML, Bootstrap, JavaScript, Spring Boot , and SQL. Provided functionalities for adding, updating, and deleting employee records.

E-Commerce Website (React): Implemented a website for a motorbike and car shop using React, HTML, CSS, and JavaScript. Enhanced user experience with features for browsing and purchasing items.
